Prodata Network Organiser

Your Network File Servers, Hosts and ancilliary equipment are the heart, as well as the show piece of your installation. So doesn't it make sense to have them organised? When time is critical, doesn't it make sense to be able to access them easily? And when the Managing Director is showing off the power of your expensive network investment to the Board, it would be nice to have them looking good!

The **Prodata Network Organiser** lets you achieve these mission critical objectives, regardless of the size of your network. We can provide a solution that exactly supports your hardware and space requirements.

Totally modular, the **Prodata Network Organiser** allows units and equipment to be easily changed, moved or reconfigured, all to your specific needs.
When dealing with the manufacturer your exact requirements can be achieved!

▲ **Fixed floor server shelf** *(shown).*
Unit can be placed on castors – allowing your entire platform to be transported as required.

◄ **2 x 2400mm Units** (*shown*)
Positioned back to back. This creates an aisle giving total access to your equipment.
'Cable Baskets' manage your cables. Configuring your **'Network Organiser'** with cable baskets and **cable ducts**, ensures data cables & electrical cables remain **isolated**. Each work surface & shelf can be positioned @ 50mm increments. Industry endorsed power rails are utilised.
Captive plugs also available.

Keep your Solution Customised

As your requirements change, the **Network Organiser** reconfigures with no fuss!
Additions can be made; shelves, work surfaces; extensions are all **modular**.

*Vertical & Horizontal cable ducts, keep
your cables neat, tidy and isolated!*

AUSTRALIAN MADE
